## EMERGENCY RELIEF OPERATION-2004

JESSORE DISTRICTS

(November-2004, 30 June- 2005)

### PART-1

## Relief Programme:

### Introduction:

IDO, is an NGO, establish in 1990 with the initiatives of some like-minded social workers of Jessore District and has been working in the field of rural development for the socio-economic and cultural upliftment of the rural poor people, specially the women and children and has been implementing different kinds of development activities since its inception. IDO has already developed a good name and fame in the operational areas for its appreciable activities and development initiatives and also has created a very good acceptance among the community people and also has built a congenial relationship with the local administrations and government departments. IDO is gradually marching forward to achieve it set goals and objectives benefiting the poverty-stricken and disadvantaged people, specially the women folk and the children of the community.

In the year 2004, a serious flood affected the Keshabpur Upazilla of Jessore District, a south & western part of Bangladesh. The excessive rainwater has created the flood and affected seriously. The floodwater have affected approximately 10,000 houses, and suffered 35,000 families, because, the flood water stood for more than three month, which has destroyed standing crops, livestock, houses, etc. as, there was no employment for the people. Due high flood, many people took shelters in the high places, schools, dams, high ways etc. where they were leading a miseries lives under painful situation, where there was no sanitation facilities, no food supports, no employment and no water for the sheltered people in the sheltered places. The people were suffered, because, a big sized heap of water hyacinth was covered the areas and destroyed the standing crops and communication system. One the areas are called the granary of the crops, but now due to frequent flood it has become the famine area. During flood, the sheltered poor and vulnerable people were suffering foods, sanitation facilities, health facilities and unemployment. The affected people got some supports from the government, which were

quite insufficient to cope with the needs of the affected people. The staffs of IDO took

different efforts to help the poor victims of flood. They provided health education, sanitation facilities and food supports through collecting supports from the richer families. IDO communicated with OXFAM-GB Bangladesh and placed the total situation of the flood and requested support for the flood victims. The donor **European Commission ECHO & OXFAM Bangladesh** paid visits to the affected areas and responded quickly and provided us supports to help the poor and vulnerable sheltered flood affected people. After having support form OXFAM-GB Bangladesh, IDO has perform the following activities:

**Name of the project : Emergency Relief Oparation-2004.  
Keshabpur Upazila Of Jessore Distrct.**

**Reporting period :** November-2004, 30 June 2005

**Project areas :** 41 villages of 5 Unions under Keshabpur,  
Upazillas of Jessore District.

### **The Project Implementation of planned activities and progresses:**

The project activities have been carried out under the following ways:

#### **a.) Management Committee:**

A Management Committee was formed with 5 members (IDO-4 & OXFAM-GB-1) to implement the project activities smoothly and effectively.

SL	Name	Designation	Designation for the Committee
1	Md. Mizanur Rahman	Executive Director	Chairman
2	Jatan Kr. Das	Project Coordinator	Member
3	Md. Akhlaqur Rahman	Project Manager-oxfam	Member
4	Zohora Afsana	Accountant	Member
5	Tapati Bit	Supervisor	Member

#### **b) Logistic Committee:**

A Logistic Committee was formed with 5 members (IDO-4 & OXFAM-GB-1).

SL	Name	Designation	Designation for the Committee
1	Tapati Bit	Supervisor, Credit.	Chairman
2	Md. Akhlaqur Rahman	Project Manager-oxfam.	Member
3	Md. Aslam Sk.	Supervisor, Construction.	Member
4	Md. Anisur Rahman	Organizer, Credit.	Member
5	Md. Abdul wohab	Organizer, Credit.	Member

#### **c) Purchase Committee:**

A Purchase Committee was formed with 5 members (IDO-4 & OXFAM-GB-1). The Purchase Committee purchased the relief items from market and stocked in the store of IDO.

SL	Name	Designation	Designation for the Committee
1	Jatan Kr. Das	Project Coordinator	Chairman
2	Md. Akhlaqur Rahman	Project Manager-Oxfam	Member
3	Zohora Afsana	Accountant, IDO.	Member
4	Tapati Bit	Supervisor, Credit.	Member
5	Md. Razaul Karim	Do	Member

#### **d) Distribution Committee:**

The Distribution Committee is as follows:

SL	Name	Designation	Designation for the Committee
1	Jatan Kr. Das	Project Coordinator	Chairman
2	Md. Zaharul Islam	Supervisor	Member
3	Md. Moteiar	Supervisor	Member
4	Md. Arshaf Ali	Supervisor	Member
5	Shamima Sultana (poly)	Do	Member

#### **Staff/volunteer involvement and orientation:**

After having the project, necessary staffs and volunteers were involved for the project implementation and they were provided necessary orientation before starting the project implementation.

#### **Base Line Survey:**

To identify the actual sufferers of the most flood-affected peoples, hard core-poor and very poor and vulnerable affected people, a-base line survey (Oxfam-GB survey format) was conducted by the staffs and from the survey, the following vulnerable affected people were given preference to provide supports:

- a) widow
- b) divorce
- c) pregnant mother
- d) Lactating mother
- e) Old/Egged
- f) Landless
- g) Women headed family
- h) Disable

#### **Project Participants selection:**

- i) IDO had the affected people's list already, because, IDO surveyed the affected areas before, but as the number of participants was to big, so, the staff members sat with the volunteers and surveyed the total situation of the poor affected people and then with the discussion and considering the criteria, the participants' lists were finalized to involve with the program. According to the criteria, the following participants were selected i.e. for relief materials support. The criteria were: widow ,divorce, pregnant mother, Lactating mother, Old aged, Landless, Women headed family, Disable

### Relief materials supports:

Different relief materials were collected from the market according to the list of the project by the

purchasing committee and stocked in the store of the organization and then according to the planned

programs, the materials were provided to the selected and listed affected people under the supervision and guidance of the senior staff and OXFAM-GB Representative. The local administrative personnel also were involved during relief materials distribution. Details are given below:

### Vegetable Seed (master pac.)distribution:

A total of 2500 families were given vegetable Seed with 8 types of seeds in one master pack.

### Agri Tools Distribution Reoprts:

#### **Base line survey for Agri. Tools:**

Since December 29, We started need base survey for Agri. tools support of beneficiaries. Bangladesh is an Agricultural country. 80% people are depends on agriculture but the labour do not posses any agriculture tools and that's why Oxfam-GB decided to help the needy people in this sector. We surveyed door to door and listed the name of actual needy people. Finally we selected 28 families for Plough Set and 450 families for Spade Set. The detail shown in the chart enclosed.

#### **Criteria for Agricultural Tools Support:**

- Flood affected people
- The farmers who have no ability for purchase their essential Agricultural Tools.
- People who have lost their Agricultural Tools by the wave of devastating flood.
- The farmers who have cattle for draft they will get Plough and yolk set.
- The day labour, who have no Scissors, Spade, Thinner, billhook, we will support them.

#### **Distribution Coverage (For Agri. Tools):**

Total of 478 Set of Tools (450 Spade Sets & 28 Plough Sets) were distributed among 4000 families and they covered under 'A' & 'B' category. All beneficiaries are engaged in agriculture and they cultivate their own land or share cropped land. Farmers and daily labours are highly satisfied for get support of Agri. Tools.

### Polythene Distribution:

A total of 2457 pieces of polythene sheets were given for fixing temporary shelters in different high places for taking shelters. A total of 2457 families were covered, which helped them for safe shelter during flood time.

### Hygiene kits distribution:

A total of 2500 hygiene kits were distributed among 2500 aged women, who are under eligible couple during shelter time, because, it was a very crucial period for the eligible couple, which helped them for safe health.

### ORS distribution:

During the flood period, the people took shelter in different shelters, where different water borne diseases were broken out. So, IDO supplied ORS among 12673 packets. Sheltered people for saving them from water borne diseases.

### **Motivation:**

The volunteers and the staff members regularly provided motivation and awareness on the use of relief materials supports, how to recover their losses and damages, how keep their health safe and sound, how build low cost hoses, install tube wells, latrines etc.

### **Follow up and monitoring:**

Two volunteer's teams were formed, who have been conducted the relief and rehabilitation activities at the affected areas under the direct supervision and guidance of the staff members of the organization. As the participants' lists were finalized earlier, so, it was easier to distribute relief supports among the beneficiaries. The Field Staff members regularly supervise and follow the project activities of the participants through field-visits, house to house visits, and also discussing with the participants. The senior staff members supervise and follow up the activities of the Field Staff and the volunteers frequently Apart from these, in the monthly staff meeting, total progresses and performances are reviewed and take necessary actions for remedy.

### **Output/Impacts:**

#### **Food Staff:**

- Flood effected people have recover their crises moment
- Social insecurity has decreased
- Lactating and pregnant women have got food
- Family peace have increased

#### **Fodder:**

- Poor people have able to given fodder for their cattle
- Cattle mortality have decreased after disaster
- Fodder crises decreases
- Cattle health have improved due to support of fodder

#### **Vegetable Seed:**

- Home stead vegetable production increased
- Women empowerment
- Nutritional problem have solved
- Family income increased
- Proper utilization of home stead fallow land

#### **Rice Seed:**

- Rice production increased
- HYV seed problem have solved
- Poor flood effected farmer have got way to over come their crises

#### **Agri Tools:**

- Farmer have benefited
- It is benevolent for day labor
- Way of income have opened who have sale plough

## PART-2

# Rehabilitation Programme:

### Housing and Latrine:

Maximum people have lost their houses by the devastating flood. From our survey report, we have found that 80% houses have fully damaged and 20% houses have partially damaged. At first, we selected 200 nos. of

beneficiaries for housing out of 2500 beneficiaries. Then our volunteers went to field for selecting beneficiaries as per our target. Volunteer selected 200 beneficiaries by door to door visits. Finally we (Monitor) cross checked 100% and selected 200 families in 5 Unions of Keshabpur Upazilla. We constructed a house as demonstration for better implementation. In most of the cases we selected house and latrine in a package.

- Main activities** :
- 1) House Support.
  - 2) Latrine Support.
  - 3) Ring-Well Support.

**Rehab. Committee Formation:**

A meeting was held at Banchte Shekha conference room under the presided over by Mr. Hyder (Project Manager) on 14<sup>th</sup>. February’ 2005. All the Monitors, Project officer, Organization’s Delegate were present that meeting. All the participant of the meeting consensus that

Rehabilitation. Committee will be formed in every village for better transparent of the program. Rehabilitation Committee will be contracted as per Oxfam-GB guideline.

- Merits:** i) Community leader has engaged through this process  
 ii) Selection process is so much transparent  
 iii) We have evicted any type of hidden side due to R. C.  
 iv) Community leader is very happy so that they are involve in the committee

**Demerits:**

- i) Some committee members try to deceive of innocent beneficiaries.

## Impact of rehabilitation support:

### House:

- Hard core people have got shelter
- Woman privacy have increased
- Woman empowerment increased because of woman ownership of house
- Social status have increased
- Mantel torture have relieved due to support of house

### Latrine:

- Sanitary problem solved
- User health is safe for sanitary latrine
- Woman privacy have increased
- Pollution problem have solved
- Social status have increased

### Ring-Well:

- Safe drinking water
- Arsenic free water
- Use of surface water
- To protect the arsenic contamination of different soil layer
- Iron free water
- Practice of indigenous knowledge

## PART-3

### (Additional) Rehabilitation Programme:

#### Latrine:

Maximum people have lost their Latrine by the devastating flood. From our survey report, we have found that 80% Latrine has fully damaged and 20% Latrine has partially damaged. At first, we selected 200 nos. of beneficiaries for Latrine out of 2000 beneficiaries. Then our volunteers go to field for selecting beneficiaries as per our target. Volunteer selected 200 beneficiaries by door to door visit. Finally we (Monitor & IDO Management) cross checked 100% and selected 200 families in 5 Unions of Keshabpur Upazilla. We constructed a Latrine as demonstration for better implementation. In most of the cases we selected Latrine, Bucket and Water Filter in a package, which were distributed among the selected beneficiaries.

- Main activities** :
- 1) Latrine Support.
  - 2) Bucket Support.
  - 3) Water Filter Support.

Sl. No.	Nature of Rehab.	<u>Details information</u>		Covered Villages.	Total benif. beneficiaries
		<u>Targeted Families</u>	<u>Actual. Families</u>

#### Impact of Reab. Support:

#### Bucket:

- 1955 families have buckets.
- Preserving water safe and sound.
- Increased social status.

### **Latrine:**

- Sanitary problem solved
- User health is safe for sanitary latrine
- Woman privacy have increased
- Pollution problem have solved
- Social status have increased

### **Water Filter:**

- Safe drinking water
- Arsenic free water
- Use of surface water
- To protect the arsenic contamination of different soil layer
- Iron free water
- Practice of indigenous knowledge

### **Encountered problems during the reporting period :**

During the implementation period, no serious problem has been encountered but there were some small problems and limitations:

- According to needs, foodstuffs supports were less, to pressure of the people were created.
- Some pressure of local elite and representatives.
- Unavailability of skilled meson
- Availability of fund in proper time
- Lack of massive ware house(Store room)

### **Recommendations:**

Considering the successes and failures of the project implementation of Relief & Rehabilitation program for the flood-affected people, the following recommendations are place for future course from our practical working experiences and future people's needs:

- a) 1,000 families' homesteads raising through cash for work.
- b) Supports are essential for village infrastructure development, which may be cash for work.
- c) Disaster Preparedness and Management program should be continued for the people of the disaster prone areas, because, the people are not well aware about the disaster and preparedness.

- d) Supports are essential for Flood Shelter, because, continued for the people of the disaster prone areas.
- e) Supports are essential for IDO Emergency Store Room, because, continued for the people of the disaster prone areas.
- f) Training for R.C. committee is essential
- g) Awareness build up program is essential for Dug Well water user

**Conclusion:**

IDO had been provided all sorts of efforts to make the project implementation fruitful and successful and also to select appropriate affected people. The staff and the Executive Committee members tried hard to make the project a success and benefit the flood affected people. But from working with the people, it has been found that there is lot of needs still, which have been given in recommendations and hope the benevolent authority will favorably consider the recommendations and continue the project activities for considering future context of development, because, the areas are highly disaster prone due to nearness of the Bay of Bengal.

We anticipate all kind of supports, suggestions, and advice from all concerns for more fruitful development interventions in future for the affected people.

We are thankful and grateful to our donor OXFAM-BG Bangladesh and the people, who have been supported us, for implementing the flood affected poor peoples and also for their co-operation and moral support for the severely flood victims. Hope, our mutual co-operation will be continued in future march of IDO.

**Md. Mizanur Rahman,**

Executive Director.
